Partnering with churches to reach
communities for Christ.

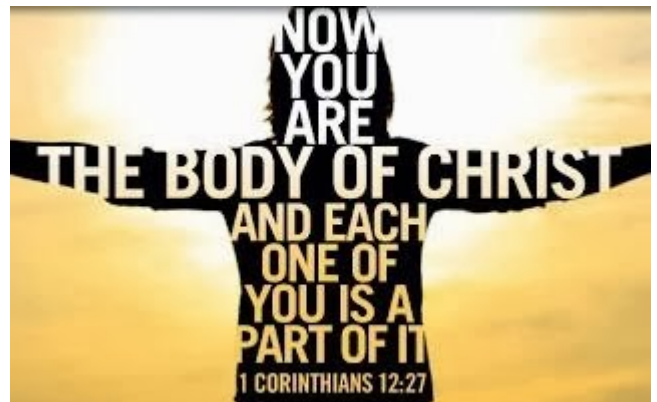

From the desk of our Director of Missions

Christ referred to us as his body. The members of our physical body have a special kind of union with one another. They have a connection that goes beyond unity. When I think of unity, I think of a collection of different parts that are organized and work together to accomplish a task. A mechanical watch, for example, is a collection of separate parts that are organized to keep time. If one were to disassemble the watch, each part could exist independently from the others.

The church, however, is not merely assembled parts, placed together to accomplish a task. The church is a body, and the members of a body are living, and they impart life to one another. Separated, the members of a body will die. My fingers, toes, heart and lungs, with their special functions and abilities, are designed to be life giving. As each member of the body of Christ walks in the Spirit, we contribute something life giving to the other members of the body.

I'm encouraged by the life giving relationships that we have within our Association. Over the past 7 months, many of you have breathed spiritual life into me through our discussions, prayer and serving together. Our Association has the potential for more and deeper connections, and that is a very exciting and energizing prospect. My hope and prayer and work is increased fellowship among the saints, so that we might impart spiritual life and vitality to one another.

Dear DBA Partners,

I know you have heard of the devastating floods in Texas and want to help. The Georgia Baptist Mission Board is collecting Buckets of Care for the affected areas, and we wanted to give you the opportunity to participate. In addition to the items below please feel free to include a bible and/or gospel tract.

Attached is a copy of the homeowner instructions – Mud Out in a Minute to include in the buckets.

PS. All items MUST be put in 5 gallon buckets which are available at Lowes, Handy Andy, Home Depot, and maybe Walmart. Remember, all buckets must have a lid.

DROP OFF: DBA office

In addition to the Buckets of Care, there is a great need for those who are willing to serve as Disaster Relief volunteers. According to GBMB,

“The number of volunteers has declined drastically since we have not been called out for several years. Now with Hurricane Harvey we need all the help we can get.”

If you would like to serve as Disaster Relief volunteer in Texas, orientation (which is required for all volunteers) will be at New Providence Baptist Church, Forsyth, GA, on September 16, 2017. The registration deadline is Sept. 8th. At this credentialing session, you will receive an introduction to the overall ministry of Disaster Relief, 3 ministry areas (Child Care, Cleanup & Recovery, and Feeding), and Evangelism Encouragement.

Please go to <https://missiongeorgia.org/georgia-disaster-relief/> to register. Scroll down and click ‘Click here to register online.’ OR ‘Click here for a PDF Registration Form.’

The cost for Disaster Relief Orientation is \$40.

The schedule is

- 7:30 – 9:00 AM Registration/Check-in (Please arrive no later than 8:15 AM)
- 9:00 AM – 1:00 PM Training

Depending on how many people sign up, the DBA may provide transportation, so please let us know if you are going.

Mud Out in a Minute

WARNING: The water and mud in your house was filled with all kind of bacteria. You **MUST** protect eyes, mouth, and nose. A small scratch can become easily infected unless you treat it at once.

Preparation: In order to avoid the above mentioned risk, do the following **BEFORE** you begin:

- Keep ventilation in house (doors and windows open) while working with bleach. Turn fan on if you have one.
- Wear Rubber boots or water proof shoes, and old clothes that you don't mind throwing away.
- Put on Latex gloves, mask and safety goggles.
- Put work gloves on **OVER** latex gloves.

Step One: Removal

- Remove furniture.
- Cut carpet in 2' strips and pull out.
- Wood floors and tile may need to be removed down to sub-floor.
- Use the chalk line to mark a line 2' above the high water mark. Cut through dry wall or paneling. (Try to cut walls at 2' or 4' heights. This will make installation of new walls easier and more cost effect.)
- Take out the cut wall material.
- Cut insulation at same height as wall and remove.
- If electrical wiring has cloth or paper insulation, it must be removed to last junction above high water mark.
- Pull all nails from exposed wall studs.

Step Two: Clean & Sanitize

- Mix "Shock Wave" (to be provided on site) with one gallon water in a pump up sprayer.
- Spray walls (exposed studs) with mixture.
- Wash walls with a pressure washer using the jet setting of nozzle.
- Use a squeegee or broom to push water out of house.
- Spray walls again with bleach mixture, but do **NOT** wash this spraying off.
- Let walls completely dry before installing new walls.

Things to remember:

- The flood environment is a highly contaminated area. Any personal injuries should be immediately cleaned and bandaged.
- Refrigerators and freezers cannot be salvaged and should be disposed. Do **NOT** clean out. Use duct tape to seal the appliance, and then remove it from the house.
- All tools and equipment should be decontaminated with the bleach solution daily.

**PRAY for protection before starting and
say a prayer of thanksgiving when completed.**
